Subject: NBH Monitoring - Sed Traps
Date: 06/17/2009 12:18 PM
For Follow Up: Normal Priority.

Dave:

Dave Walsh and I just spoke about locating the 4 sediment traps in the harbor. The SOW includes the following:

- 1 south of the I-195 Bridge,
- 1 north of the Coggeshall Bridge,
- 1 south of the Woods Street Bridge,
- 1 north of the Wood Street Bridge.

As we spoke this morning on the call, it would be good to talk to you about the objectives. Certainly, the proximity of the traps to the dredges and/or the WQM moorings "might" provide some "cause and effect"/correlation trends to be considered. Also, proximity to the City's dredging/CAD Cell disposal may be a consideration.

We just left a message on your voice mail re: this issue and look forward to hearing back from you.

Bob
